I'd like to, but I'll have to pass – doing this FS takes precedence.

**Subject:** Re: Fish research

Yes, it does. Would you like me to try to set up a call? Would you like to be on the call?

Phil,

Can you respond to this – sounds interesting.

Thanks,

Subject: Fish research

Gary,

Linda Broach (TCEQ) recommended that I contact you about a research project that my group, along with other collaborators from Baylor and MIT, are interested in initiating adjacent to the San Jacinto Waste Pits site. The project involves caging fish for bioavailability studies, as well as the use of passive samplers. My group has been working for a few years on adaptation and toxicity in Gulf killifish at polluted sites along the Houston Ship Channel, and my collaborator Sascha Usenko is an environmental chemist that has already worked at the Waste Pits site. Our MIT collaborators are experts in passive sampling. I'd love to talk to you about the project. Are you available for a phone call next week?

Thank you for your time.

Best wishes, Cole
